🔗 szaid47

Passionate about building impactful solutions, grounded in data structures and algorithms. My experience spans full-stack web development, machine learning, and building agentic AI systems. My focus is on turning complex data into simple, valuable products that are intuitive for users.

Education

St. Joseph Engineering College, Mangalore Bachelors of Engineering in Computer Science	Dec 2022 – Mar 2026 CGPA: 9.04
Boscoss Pre University College Grade: 12th	Jul 2020 – Mar 2022 Percentage: 91.67%
St. Aloysius English Medium School Grade: 10th	Jul 2010 – Mar 2020 Percentage: 97.98%

Experience

Data Analysis Intern Infosys Springboard	Remote Feb 2025 – Mar 2025
◦ Analyzed and visualized Indian city-level GDP and productivity data using Power BI and Streamlit to highlight regional economic trends through interactive dashboards. ◦ Developed interactive dashboards consolidating over 500+ data points into visual reports, enabling city planners to make informed decisions projected to increase urban project approval rates by up to 30%.	
Data Operations Intern Flipkart	On-Site Sep 2024 - Oct 2024
◦ Rectified 300+ daily logistical bottlenecks by leveraging FLO and Excel during the Big Billion Days sale, effectively managing high load while maintaining a 99.9% on-time order fulfillment rate. ◦ Collaborated with the Issue Resolution Team to resolve over 500 inventory and delivery discrepancies, ensuring 98% data accuracy across logistics operations during peak sales.	

Projects

AlgoMeet / Next.js, ConvexDB, Clerk, Tailwind CSS, YOLO, OpenCV	GitHub
◦ A real-time coding interview platform built to reduce certification costs by eliminating in-person proctoring, with authentication, collaborative, and video features. ◦ Includes an AI-based proctoring system using YOLO and OpenCV to detect eye and head misalignment, optimized by processing every 5th frame for efficiency.	
Digital-MRF/ Django, SQLite, Docker, HTML, CSS, JavaScript	GitHub
◦ Selected among the top 50 entries for the DC Fellowship Program; built a solution to streamline operations at Material Recovery Facilities (MRFs), enabling digital tracking of waste collection, automated reporting, and improved transparency in waste management workflows.	
Ocean-View/ React (TypeScript), TailwindCSS, FastAPI, YOLO, OpenCV, Ultralytics	GitHub
◦ A full-stack application that detects and categorizes marine debris in underwater imagery using advanced computer vision models. ◦ Supports real-time single image and multi-frame video processing, with a scalable business model reducing cleanup costs by 60%. Selected among top 15 at Nitte Hackfest.	

P.T.O

Skill

Programming: Python, Java, C, JavaScript, HTML , CSS

Frameworks & Libraries: Django ,NextJS, React, Streamlit, shadcnUI , Flutterflow

Database & Platform: MySQL, MongoDB, AWS , Firebase

Development Tools: VSCode , Git, GitHub, Docker , PowerBi

Soft Skills: Problem-Solving, Critical thinking, Communication, Teamwork, Adaptability, Time Management, Leadership, Attention to Detail, Creativity.

Certifications

- [AWS Academy Graduate - AWS Academy Cloud Foundations](#)
- [Postman API Fundamentals Student Expert](#)
- [Github Foundations.](#)
- [Business Intelligence & Analytics \(NPTEL \) .](#)
- AWS Solutions Architect – (on going).

Achievements

- **Top 15** in the nation-level Hackathon **Hackfest** held at NITTE college of Engineering.
- Secured a mentorship offer from **Manipal MedTech Hackathon** expert judge to advance our **FitPhysio - AI-based physiotherapy prototype** for rural and disabled communities toward a working pilot.

Volunteering

- **Chairperson** – IEEE Student Membership - Led student engagement by organizing technical quizzes, guest lectures, and interactive sessions to promote innovation and learning within the IEEE community
 - **HackerSpace** Mangaluru – Part of a community driven open source group .
 - **Google Developer students Club** - Participated in workshops to build real-world projects with Google technologies.
-
